SUMMARY

A motivated junior developer skilled in React, Next.js, and React Native, Python,JavaScript actively building responsive web and mobile applications, including air ticketing platforms and farming solutions. Eager to grow and deliver user-focused, high-quality code in collaborative environments.

EXPERIENCE

Mobile and Web Development

- Build and maintain front-end features for web applications, such as an air ticketing platform, using React and Next.js, ensuring responsive and user-friendly interfaces.
- Contribute to the development of the E-Grow - Easy Farming mobile app using React Native, collaborating with team members to deliver core functionalities.
- Work under senior developers to adopt modern development workflows, applying best practices for code quality and efficient project delivery.

Python Development

- Developed and maintained front-end components for web applications using Next.js, React, and related technologies.
- Collaborated with senior developers to implement new features and improve existing codebase.
- Gained hands-on experience with modern web development workflows and best practices.

React Development

- Annotated diverse datasets to support AI and machine learning projects, ensuring high-quality data labeling in a remote setting.

PROJECTS

HealthAssistant App | *Full Stack Development*   Health-HA.com
- Built full stack Health App using modern web technologies.

Edubridge | *Full Stack Web App*   Edubridge.com
- Built an educational platform with automated web scraping to integrate syllabus materials and examination resources.
- Built an educational platform with automated web scraping to integrate syllabus materials and examination resources.

CodePulse | *Next.js, TypeScript, tailwind CSS, PostgreSQL,Authentication*   Codepulse.com
- CodePulse is a full-featured code coverage platform that helps developers visualize, track, and improve test coverage across their projects.

SKILLS

- **Front-End Development:** HTML5, CSS3, JavaScript, React, Python(Tkinter ,Streamlit), Tailwind CSS, Figma/ui
- **Back-End Development:** Next.js API Route, Python, MongoDB
- **Tools:** Git, GitHub, Visual Studio Code, Cursor,Pycharm,Figma,Framer Motion,Google Analytics, Firebase Auth, Auth0,

EDUCATION

Bhairahawa Multiple Campus   Bhairahawa, Rupandehi
BSc. Computer Science and Information Technology, IOST, TU   *jun. 2024 – Present*
